

# WORKSHEETS — SAG<sub>2</sub>

Eco-efficiency resources for the food processing industry

*These worksheets are a component of the eco-efficiency self assessment guide (SAG<sub>1</sub>) for the food processing industry and should be used in conjunction with the Six step checklist (SAG<sub>1</sub>), Opportunities checklists (SAG<sub>3</sub>) and fact sheets. They have been developed to help food processors in documenting the eco-efficiency process within their company and allow easy transfer of information into the ecoBiz tool.*

**The following worksheets can be found in this series:**

- **Worksheet 1:** Data collection
- **Worksheet 2:** Baseline assessment data collection
- **Worksheet 3:** Key performance indicators
- **Worksheet 4:** Energy consumption
- **Worksheet 5:** Water consumption onsite (incoming and recycled)
- **Worksheet 6:** Trade waste generation (discharging offsite)
- **Worksheet 7:** Solid waste generation
- **Worksheet 8:** Potential eco-efficiency opportunities
- **Worksheet 9:** Preliminary evaluation of eco-efficiency opportunities
- **Worksheet 10:** Economic evaluation of eco-efficiency opportunities
- **Worksheet 11:** True cost of water
- **Worksheet 12:** Action plan

Visit the project website [www.ecoefficiency.com.au](http://www.ecoefficiency.com.au) for more ideas and case studies.
