REGISTER YOUR INTEREST

\* Price includes GST. The cost of the assessment is \$1,862.50 for businesses with less than 100 employees and \$2,505 for businesses with greater than 100 employees. [Valid until 31 January 2025]

**Note:** Our Advisors and the Business Sustainability Assessment Tool and reports from this program provide targeted advice based on your input. This is not financial product advice. Before implementing any action, we recommend you consult your licenced financial advisor.

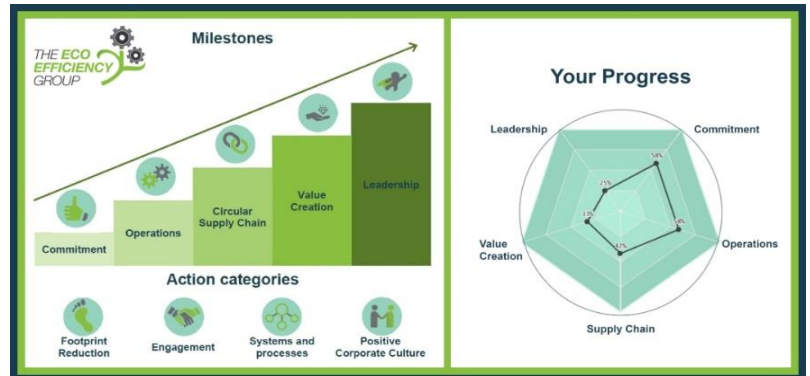

# Queensland Manufacturers Sustainability Benchmark Assessment

## What does the program involve?

### Part 1: Sustainability Strategy Review

Understand your position on your sustainability journey and receive a tailored Action Plan to help you take the next step.

Undertake a self-assessment of your current sustainability related actions using an online tool that has been specifically aligned with the United Nations Sustainability Goals. The assessment will highlight your strengths and areas to improve on your sustainability journey.

### Part 2: Site-based Sustainability Benchmark Assessment

Receive expert help to measure and benchmark your business's resource use, waste and greenhouse gas (GHG) emissions and develop a detailed action plan to reduce costs and your environmental footprint.

The Ecoefficiency Group (TEG) will work with you to develop a baseline and provide a list of resource efficiency and sustainability opportunities. TEG will provide a customised benchmarking report that includes your self-assessment results and can assist you to develop your near and long term sustainability strategy, Net Zero plan and feed into sustainability reporting within your supply chain.
