Note: Our Advisors and the Business Sustainability Assessment Tool and reports from this program provide targeted advice based on your input. This is not financial product advice. Before implementing any action, we recommend you consult your licenced financial advisor.

Queensland Manufacturers Sustainability Benchmark Assessment

What does the program involve?

Part 1: Sustainability Strategy Review

Understand your position on your sustainability journey

Undertake a self-assessment of your current sustainability activities using an online tool that has been specifically aligned with the United Nations Sustainability Goals. The assessment will highlight your strengths and areas to improve on your sustainability journey.

Part 2: Site-based Sustainability Benchmark Assessment

Receive expert help to measure and benchmark your business's resource use, waste and greenhouse gas (GHG) emissions and develop a detailed action plan to reduce costs and your environmental footprint.

The Ecoefficiency Group (TEG) will work with you to develop a baseline and provide a list of resource efficiency and sustainability opportunities. You will receive a customised report that includes your self-assessment results and can assist you to develop your sustainability strategy and action plan, and feed into sustainability reporting within your supply chain.

Part 3: Implementation support

Receive a 12-month subscription to the Green KPI program and access to quarterly meetings with TEG to implement and track your sustainability actions against your goals.

Why be involved in this program?

Leading manufacturers reap the benefits of sustainability benchmarking - financially, reputationally, and socially.

Let us help you:

- ✓ Track progress and cut costs by reducing energy, water, waste and GHG emissions.
- ✓ Set achievable targets, reduce your footprint and reduce risk.
- ✓ Engage with your staff, supply chain and customers.
- ✓ Show sustainability leadership and inspire others.
- ✓ Use sustainability to value add & tap into new markets.
